# Volume 85 1978

## Table of Contents

No. 1 1—316 issued on April 3, 1978
No. 2 317—622 issued on April 17, 1978

1 The Dependence of Acetylcholinesterase Aggregation at Low Ionic Strength upon a Polyanionic Component
S. Bon, J. Cartaud, and J. Massoulié

15 Valine Uptake and Incorporation into Protein in Isolated Rat Hepatocytes. Nature of the Precursor Pool for Protein Synthesis
P. O. Seglen and A. E. Solheim

27 Interaction of the Acetylcholine (Nicotinic) Receptor Protein from *Torpedo marmorata* Electric Organ with Monolayers of Pure Lipids
J.-L. Popot, R. A. Demel, A. Sobel, L. L. M. van Deenen, and J.-P. Changeux

43 Requirement for 'Factor(s)' for Tubulin Assembly during Brain Development
J. Francon, A. Fellous, A. M. Lennon, and J. Nunez

55 Membranes Rich in Acetylcholine Receptor: Characterization and Reconstitution to Excitable Membranes from Exogenous Lipids
W. Schiebler and F. Hucho

65 Membrane Lipid Metabolism in *Acholeplasma laidlawii* A EF 22. Influence of Cholesterol and Temperature Shift-Down on Incorporation of Fatty Acids and Synthesis of Membrane Lipid Species
A. Christiansson and Å. Wieslander

77 Lanthanum as a Tool to Study the Role of Phosphatidylinositol in the Calcium Transport in Rat Parotid Glands upon Cholinergic Stimulation
G. Keryer and B. Rossignol

85 The Aminoacyladenylate Mechanism in the Aminoacylation Reaction of Yeast Phenylalanyl-tRNA Synthetase
F. Fasiolo and A. R. Fersht

89 Phosphoglycerate Kinase B from Ram Testis. Purification, Characterisation and Comparison with the Muscle Isoenzyme
A. A. Stewart and R. K. Scopes

97 The Action of Lysozyme on Partially Deacetylated Chitin
K.-I. Amano and E. Ito

105 Characterization of Proteins from Nucleolar Preribosomes of Mouse Leukemia Cells by Two-Dimensional Polyacrylamide Gel Electrophoresis
M.-A. Auger-Buendia and M. Longuet

115 Changes in Chromatin Properties after Partial Extraction of Non-histone Proteins
A. I. Bokhon'ko and V. V. Razumova

121 Effect of Methylamine on Trypsin Catalysis
T. Vajda and T. Szabó

125 Purification and Properties of Reduced Ferredoxin: $CO_2$ Oxidoreductase from *Clostridium pasteurianum*, a Molybdenum Iron-Sulfur-Protein
P. A. Scherer and R. K. Thauer

137 Particulate Tyrosinase of Human Malignant Melanoma. Solubilization, Purification Following Trypsin Treatment, and Characterization
K. Nishioka

147 The Electrochemical Proton Gradient Generated by Light in Membrane Vesicles and Chromatophores from *Rhodopseudomonas sphaeroides*
P. A. M. Michels and W. N. Konings

157 Kinetic Evidence for Interaction between Aldolase and D-Glyceraldehyde-3-Phosphate Dehydrogenase
J. Ovádi and T. Keleti

163 Glycosylation *in vitro* of Semliki-Forest-Virus and Influenza-Virus Glycoproteins and Its Suppression by Nucleotide-2-deoxy-hexose
R. T. Schwarz, M. F. G. Schmidt, and L. Lehle

173 Steady-State Kinetic Studies on Adenylate Cyclase from *Brevibacterium liquefaciens*
I. Özer and K. H. Scheit

181 Effect of Choline Deficiency on the Enzymes that Synthesize Phosphatidylcholine and Phosphatidylethanolamine in Rat Liver
W. J. Schneider and D. E. Vance

189 Immunological Studies on CTP: Phosphocholine Cytidylyltransferase from the Livers of Normal and Choline-Deficient Rats
P. C. Choy, W. J. Schneider, and D. E. Vance

195 Nucleotide Sequence of Part of the Simian Virus 40 *Hin*d-D Restriction Fragment. The Presumed Initiation Region of the VP2 Gene
M. Ysebaert, H. van Heuverswyn, A. van de Voorde, and W. Fiers

205 Nucleotide Sequence of the Simian Virus 40 *Hin*d-K Restriction Fragment
R. Rogiers, A. van de Voorde, E. Soeda, and W. Fiers

225 Properties of Microsomal and Soluble Diacylglycerol Kinase in Rat Liver
H. Kanoh and B. Åkesson

233 Interaction between Membrane Functions and Protein Synthesis in Reticulocytes: Specific Cleavage of 28-S Ribosomal RNA by a Membrane Constituent
D. Wreschner, D. Melloul, and M. Herzberg

241 Studies on the Conformation of the 3′ Terminus of 18-S rRNA
J. K. Vass and B. E. H. Maden

249 ABH-Blood-Group Antigens and Glycolipids of Human Saliva
B. L. Slomiany and A. Slomiany

255 Freeze-Fracture Appearance and Disposition of Band 3 Protein from the Human Erythrocyte Membrane in Lipid Vesicles
W. J. Gerritsen, A. J. Verkley, R. F. A. Zwaal, and L. L. M. van Deenen

263 Isolation of Soluble Proteins Capable of Stimulating Aerobic Plasmalogen Biosynthesis
F. Paltauf

271 Isolation and Characterization of Free Cytoplasmic Messenger Ribonucleoproteins from Rabbit Reticulocyte
Huynh-Van-Tan and G. Schapira

283 L-Glutamate Dehydrogenase. The Catalytic Properties of the Mercurial-Activated Enzyme
M. P. Cosson, D. Pantaloni, and M. Iwatsubo

291 Ferredoxins from Nitrogen-Fixing Bacteria. Physical and Chemical Characterisation of Two Ferredoxins from *Mycobacterium flavum* 301
M. G. Yates, M. J. O'Donnell, D. J. Lowe, and H. Bothe

301 Study of the Sulfhydryl Groups of β-D-Xylosidase from *Bacillus pumilus*
E. Saman, M. Claeyssens, and C. K. de Bruyne

309 The Binding Site of Ribosomal Protein L1 from *Escherichia coli* on the 23-S Ribosomal RNA from *Bacillus stearothermophilus*. A Possible Base-Pairing Scheme Differing from That Proposed for *Escherichia coli*
J. Stanley, P. Sloof, and J.-P. Ebel

317 Active-Site Catalytic Efficiency of Acetylcholinesterase Molecular Forms in *Electrophorus, Torpedo,* Rat and Chicken
M. Vigny, S. Bon, J. Massoulié, and F. Leterrier

325 Interaction between Penicillin and the DD-Carboxypeptidase of the Unstable L-Form of *Proteus mirabilis* Strain 19
W. Schilf, P. Frère, J.-M. Frère, H. H. Martin, J.-M. Ghuysen, P. Adriaens, and B. Meesschaert

331 Interaction of Adenylosuccinate Synthetase with F-Actin
H. Ogawa, H. Shiraki, Y. Matsuda, and H. Nakagawa

339 On the Mechanism of the Cytochrome c Oxidase Reaction. A Study of the Anaerobic-Aerobic Transition of the Carbonmonoxide Inhibited Ascorbate → Cytochrome *c* → Cytochrome $aa_3$ System
L. C. Petersen

345 Anion Binding to Yeast Phosphoglycerate Kinase
J. A. Wrobel and R. A. Stinson

351 Uptake of Proteoglycans and Sulfated Glycosaminoglycans by Cultured Skin Fibroblasts
W. Truppe and H. Kresse

357 Affinity Chromatography of Phenylalanine Hydroxylase. The Structure of a Pteridine Adsorbent
R. G. H. Cotton and I. G. Jennings

365 4-Aminobutyrate Aminotransferase Fluorescence Studies
T. Beeler and J. E. Churchich

373 Carbamoylphosphate Synthetase I of Rat-Liver Mitochondria. Purification, Properties, and Polypeptide Molecular Weight
C. J. Lusty

385 Role of Acetylglutamate in Ureotelism. Variations in Acetylglutamate Level and Its Possible Significance in Control of Urea Synthesis in Mammalian Liver
K. Shigesada, K. Aoyagi, and M. Tatibana

393 The Carboxyl-Terminal Sequence of the Heavy Chain of a Hong Kong Influenza Haemagglutinin
T. A. Dopheide and C. W. Ward

399 The Androgenic Regulation of Abundant mRNA in Rat Ventral Prostate
M. G. Parker and G. T. Scrace

407 Alteration of the Intracellular Concentration of Aminoacyl-tRNA Synthetases and Isoaccepting tRNAs during Amino-Acid-Limited Growth in *Escherichia coli*
J. Thomale and G. Nass

419 Methionyl-tRNA Synthetase from *Escherichia coli*. Absence of Interaction between the Metal Ion and the Purine Ring of ATP in the L-Methionine Activation Site
F. Hyafil and J.-M. Bernassau

423 Kinetics of the Respiration of Cyanide-Insensitive Mitochondria from the Yeast *Saccharomycopsis lipolytica*
J.-C. de Troostembergh and E.-J. Nyns

433 Further Evidence for the Structure of the Teichoic Acids from *Bacillus stearothermophilus* B65 and *Bacillus subtilis* var. *niger* WM
W. R. de Boer, J. T. M. Wouters, A. J. Anderson, and A. R. Archibald

437 Electron Transport in the *cni*-1 Mutant of *Neurospora crassa*
D. L. Edwards, J. L. Klein, and J. T. Warden

445 Thermal Regulation of the Fatty Acid Composition of Lipopolysaccharides and Phospholipids of *Proteus mirabilis*
S. Rottem, O. Markowitz, and S. Razin

451 Cerulenin-Induced Changes in the Lipopolysaccharide Content and Phospholipid Composition of *Proteus mirabilis*
S. Rottem, O. Markowitz, and S. Razin

457 Translation of Encephalomyocarditis Virus RNA *in vitro* Yields an Active Proteolytic Processing Enzyme
H. R. B. Pelham

463 Nucleotide Torsional Flexibility in Solution and the Use of the Lanthanides as Nuclear-Magnetic-Resonance Conformational Probes. The Case of Adenosine 5′-monophosphate
C. F. G. C. Geraldes and R. J. P. Williams

471 Conformational Studies of Some 2′:3′-Cyclic Mononucleotides in Solution by Different Nuclear-Magnetic-Resonance Methods
C. F. G. C. Geraldes and R. J. P. Williams

479 Different Sensitivities of Chloroplasts to Uncouplers when ATP Formation is Induced by Continuous Illumination, by Brief Illumination, by Pre-Illumination, or by Acid-Base Transitions
D. R. Ort

487 The Interaction of Daunomycin with Polydeoxynucleotides
D. R. Phillips, A. DiMarco, and F. Zunino

493 Isolation of Phosphoglycerate Kinases by Affinity Chromatography
G. W. K. Kuntz, S. Eber, W. Kessler, H. Krietsch, and W. K. G. Krietsch

503 The Steady-State Kinetics of Yeast Phosphoglycerate Kinase. Anomalous Kinetic Plots and the Effects of Salts on Activity
R. K. Scopes

517 Studies on the Control of Development. Synthesis of Two Highly Phosphorylated Nucleotides Depends on Changes in the Composition of Ribosomes at the Beginning of Sporulation in *Bacillus subtilis*
H.-J. Rhaese and R. Groscurth

529 X-Ray and Neutron Small-Angle Scattering Studies of the Complex between Protein S1 and the 30-S Ribosomal Subunit
M. Laughrea, D. M. Engelman, and P. B. Moore

535 The Redox Potential of Dithionite and $SO_2^-$ from Equilibrium Reactions with Flavodoxins, Methyl Viologen and Hydrogen plus Hydrogenase
S. G. Mayhew

549 Isolation of the ADP/ATP Translocator from Beef Heart Mitochondria as the Bongkrekate-Protein Complex
H. Aquila, W. Eiermann, W. Babel, and M. Klingenberg

561 Specificity and Interactions at the Cationic Sites of the Axonal ($Na^+$, $K^+$)-Activated Adenosinetriphosphatase
B. Rossi, C. Gache, and M. Lazdunski

571 Purification and Characterization of DNA Polymerases from the Plasmacytoma MOPC 104E and Abelson Murine Leukemia Viruses
B. J. Weimann, J. Schmidt, and B. Takacs

581 The Plastid Membranes of Barley (*Hordeum vulgare*). Light-Induced Appearance of mRNA Coding for the Apoprotein of the Light-Harvesting Chlorophyll *a*/*b* Protein
K. Apel and K. Kloppstech

589 Bovine Lenticular γ-Glutamylcysteine Synthetase: Reaction Sequence
G. E. van Buskirk, J. E. Gander, and W. B. Rathbun

599 Biosynthesis of the Vacuolar Yeast Glycoprotein Carboxypeptidase Y. Conversion of Precursor into the Enzyme
A. Hasilik and W. Tanner

609 Calcium Metabolism and Enzyme Secretion in Guinea Pig Pancreas. Uptake, Storage and Release of Calcium in Whole Cells and Mitochondrial and Microsomal Fractions
M. Lucas, G. Schmid, R. Kromas, and G. Löffler
